RE: Pre-Demolition Survey Report (PDSR) for Building 771 Administration Building (East) - Approval

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the PDSR for Building 771 Administration Building (East), also identified as the B771 Administration Area, or Area AA; Revision 0 dated September 29, 2004. This PDSR was received on October 19, 2004. Based on the information contained in this PDSR we are hereby approving the PDSR for Building 771 Administration Building (East).

Although we are approving this PDSR, it is recognized, as stated in this PDSR, that this area is currently being used to stage waste containers and demolition debris generated from the demolition of B771. As such, prior to demolition, the slab will be cleaned and a verification survey will be performed. The results of this survey will be provided to us for our review and approval prior to removal.

It is also noted that in Attachment E the DQA discussion incorrectly states that Level 2 Isolation Controls have been implemented to prevent contamination of Area AA. However, this is not in agreement with the disclosure provided in Section 8, where it states that Area AA slab is being used to stage waste containers and demolition debris, and that a verification survey will be performed after utilization and prior to removal. Since this area is currently being utilized, as stated above, we will need to be presented an appropriate final survey to confirm that this area has not been contaminated during the ongoing activities.

These and all additional demolition activities and related issues are expected to be discussed and resolved utilizing the consultative process and recorded in Contact Records.

If you have any questions regarding this correspondence please contact me at (303) 692-3367, Denise Onyskiw at (303) 692-3371 or (303) 966-6687, or David Kruchek at (303) 692-3328.

Sincerely,

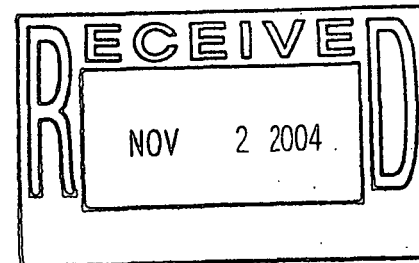

Steven H. Gunderson
